TO WHOM IT MAY CONCERN:

Pamela Riggs came to us with college credits, some data processing experience, and a sincere desire to work and do a good job.

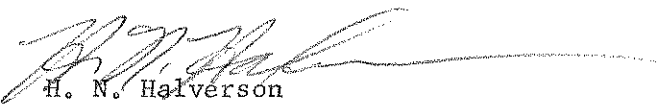

We are in a field that was quite foreign to her--we purchase land, divide it, and sell it as recreational land thereby generating receivables, salesmen commissions payable and so forth which are put on a computer.

Pam very quickly grasped all aspects of the business and performed very well as my secretary. She has a very good memory, which is essential in this business, was able to devise a practical, workable filing system, is an excellent typist, and definitely knows how to work with data processing. She has always been punctual and dependable.

It was a real pleasure and asset to have Pam as my secretary.

Very truly yours,
